

## Monsoon Onset and Withdrawal date information

Table: Monsoon onset and withdrawal date

Year	Onset date	Withdrawal date	Year	Onset date	Withdrawal date
1968	17-June	21-September	1994	10-June	23-September
1969	2-June	28-September	1995	4-June	2-September
1970	16-June	30-September	1996	31-May	18-September
1971	10-June	13-September	1997	14-June	23-September
1972	18-June	26-September	1998	13-June	3-October
1973	14-June	27-September	1999	11-June	8-October
1974	19-June	21-September	2000	6-June	25-September
1975	16-June	18-September	2001	3-June	25-September
1976	9-June	21-September	2002	15-June	19-September
1977	18-June	18-September	2003	16-June	30-September
1978	8-June	16-September	2004	9-June	1-October
1979	24-June	4-September	2005	20-June	2-October
1980	12-June	-	2006	1-June	29-September
1981	23-June	11-September	2007	7-June	9-October
1982	27-June	20-September	2008	10-June	17-October
1983	24-June	29-September	2009	23-June	15-October
1984	11-June	20-September	2010	17-June	1-October
1985	17-June	26-September	2011	15-June	7-October
1986	12-June	5-October	2012	16-June	28-September
1987	14-June	26-September	2013	14-June	19-October
1988	11-June	9-September	2014	20-June	7-October
1989	11-June	2-October	2015	13-June	3-October
1990	12-June	30-September	2016	15-June	12-October
1991	9-June	19-September	2017	12-June	16-October
1992	21-June	19-September	2018	8-June	5-October
1993	8-June	28-September	2019	20-June	12-October

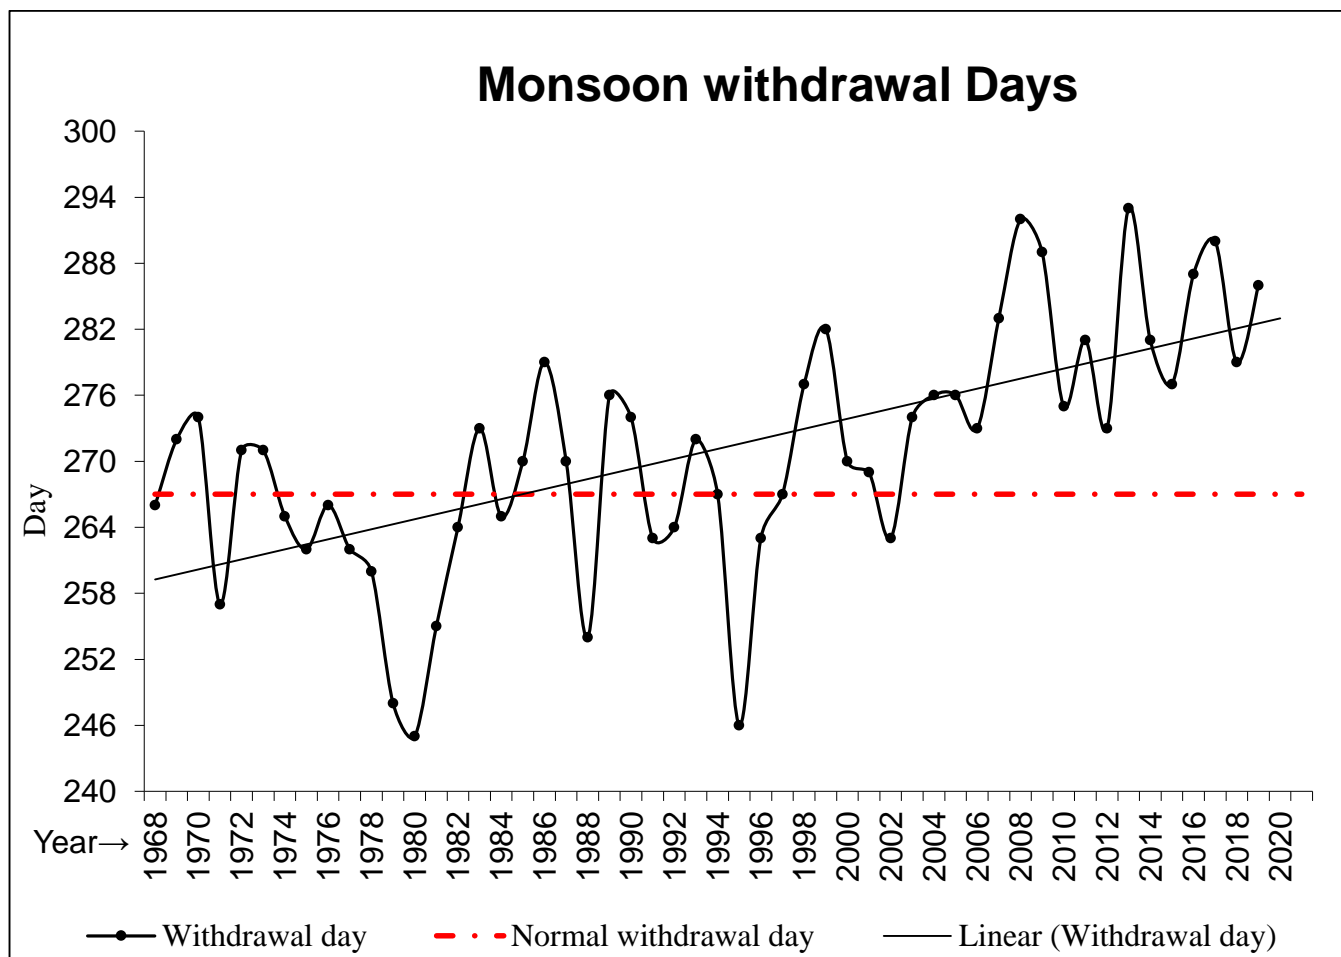

Figure 2: Monsoon withdrawal day (thick black solid line), linear trend of withdrawal day (thin black solid line) and normal withdrawal day (red dotted line)

**Note:** This year (A.D. 2019) monsoon entered from Eastern Nepal on 20<sup>th</sup> June. The arrival of the monsoon in Nepal is delayed by 10 days against the normal onset date. The normal onset and withdrawal date in Eastern Nepal is 10<sup>th</sup> June and 23<sup>rd</sup> September respectively. So, on the basis of normal onset and withdrawal of monsoon, the duration of monsoon is about 105 days. The shortest monsoon duration of 73 days was recorded in 1979 and the longest duration of 130 days was recorded in 2008. The earliest and the late onset was observed on 31<sup>st</sup> May 1996 and 27<sup>th</sup> June 1982 respectively. Similarly, the earliest and the late withdrawal was recorded on 2<sup>nd</sup> September 1995 and 19<sup>th</sup> October 2013 respectively. This year monsoon withdrew on 12<sup>th</sup> October which is 19 days delayed against the normal withdrawal. So, the duration of this monsoon is 115 days.
